

IVU2PTGX04 Image Processing – Grayscale Image Sensor

Technical data

Туре	IVU2PTGX04
ID	3090769
Camera data	
Function	Gray value
Resolution	752 × 480 pixels
Brennweite	4 mm
Special features	Wash down
Electrical data	
Operating voltage U _B	1030 VDC
DC rated operating current I _e	≤ 1000 mA
Communication protocol	EtherNet/IP Modbus TCP PCCC PROFINET RS232
Mechanical data	
Design	Rectangular, iVu PLUS
Dimensions	E4 E v 04 O v 0E O

	NOZOZ
Mechanical data	
Design	Rectangular, iVu PLUS
Dimensions	51.5 x 81.2 x 95.3 mm
Housing material	Plastic, Thermoplastic material, Black
Window material	Acrylic, clear
Electrical connection	Connector, M12 × 1, 12-wire
Display	Integriert
Ambient temperature	0+50 °C
Protection class	IP67
Tests/approvals	
Approvals	CE

Features

- Second iVu generation
- ■Internal memory for 30 inspections
- 1/3" CMOS, 752x480 pixels
- ■Without integrated ring light
- ■Protection class IP67
- ■External strobe output + 5 VDC
- ■External trigger input
- ■Lens, 4.3mm, M12x1
- Display: Integrated 65.5 mm LCD color display, 320 x 240 transreflective
- Operating voltage 10...30 VDC
- ■M12 x 1 male, 12-pin
- ■Three PNP/NPN switching outputs, selectable via software
- ■USB 2.0 host: M8 female, 4-pin
- ■Ethernet via M8 x 1 male, 4-pin
- Industrial Ethernet: PROFINET, Ether-Net/IP, Modbus/TCP, PCCC

Wiring diagram

Functional principle

The second generation of the iVu-Plus offers the user advanced features and even more options in the selection of the inspections. The sensor is equipped with the same housing and

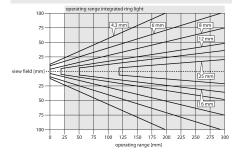

offers the same intuitive user interface and functionality of the previous iVu generation. Sensor with 3 integrated operating modes:

- 1. Pattern recognition, checks if a pattern on a target is identical to the reference pattern.
- 2. Blob detection, for identification of one or more object features.
- 3. Feature detection with positioning, which adapts to the movements.
- A blanking function for blob and feature detection is available in the new generation, so that areas in the field of view can be switched blind. Sensor configuration via PC is not required!

Storage for 30 inspections.

Mounting instructions

Mounting instructions/Description

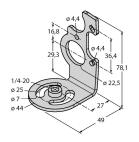

Selecting the focal length
With known object size or scan field the
matching vision sensor is found simply by
determining the ratio between the sensing
range and the focal length. Use the graphics
for selection. Here, the sensing ranges are put
in relation to the field view and the lens focal
length.

Brackets for mounting on left side

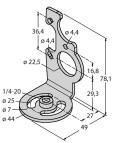

Accessories

SMBIVURAR 3082547

Brackets for mounting on right side

SMBIVURAL 3082546
